## **PERKINS III CORE PERFORMANCE STANDARDS AND MEASURES VCCS INDICATORS**

- Perkins performance measure definitions for the System were finalized with the Virginia and Federal departments of education Fall 2000 (see TABLE 1).
- System level performance for the most recent data cycle is in TABLE 2.
- Federally approved VCCS or System-level targets for the 2000-2001 reporting cycle were established and reviewed last fall (see TABLE 2).
- College data for these measures were produced for college and Workforce Development staff use (see Table 3).

## **TABLE 1**

### **PERKINS III DEFINITIONS CORE PERFORMANCE STANDARDS AND MEASURES VCCS INDICATORS**

#### **Core Indicator 1: Student Attainment**

##### **1P1 Academic Skills**

This measure is the percentage of technical majors in certificate, diploma, and degree programs successfully completing an academic skills course. Specifically, for a fall term all registrations for occupational-technical students in math, English, biology, chemistry, geology, physics, and natural science at the 100 level or higher are subset and unduplicated. This forms the denominator. An unduplicated count of students with grades of “C” or above is the numerator.

##### **1P2 Technical Skills**

Percentage of technical majors in certificate, diploma, and degree programs successfully completing a technical skills course is the basic measure. Specifically, for a fall term all registrations for occupational-technical students in occupational-technical courses, HEGIS codes greater than 5000, are subset and unduplicated. This forms the denominator. An unduplicated count of students with grades of “C” or above is the numerator.

#### **Core Indicator 2: Completion**

##### **2P2 Graduation Rate**

A subset of the federal student right-to-know measure is used which is the number of first-time, full-time, occupational-technical freshmen completing a program within 150% of the program length (numerator) as a percentage of the cohort beginning the same fall semester (denominator).

## **TABLE 1 (cont.)**

### **Core Indicator 3: Placement and Persistence**

#### **3P1 Placement, Employment and Further Study**

Virginia employment information is obtained for technical graduates within 6-12 months following graduation. Specifically, graduates of an academic year are tracked using UI files to determine their employment status in Virginia in the 4<sup>th</sup> quarter of that calendar year. For the same graduates, State Council will be asked to determine the number enrolled at a 4-year institution within the corresponding fall semester. The measure is the unduplicated count of those working or studying as a percentage of the total graduates.

#### **3P2 Retention, Employment**

Retention is defined as the percentage of those graduates found to be working, as defined in the placement measure, 3P1, who continue working for a period of at least one quarter. For example, graduates identified as working in 4<sup>th</sup> qtr. 1999 would be matched against UI employment information for 1<sup>st</sup> qtr. 2000. No baseline information has been produced. Not required in 2000-01.

### **Core Indicator 4: Equity: Program Enrollment and Completion**

#### **4P1 Representation, Enrollment**

The enrollment measure is the combined minority gender enrollments for each program as a percentage of the total enrollment for all "under-represented" programs. "Under-represented" programs are those related to occupations with gender under-representation (less than 25% minority employment, U.S. Census Household Survey).

#### **4P2 Representation, Graduates**

Similarly for the same "under-represented" programs, the representation measure for graduates is defined as the combined number of minority gender graduates from each of these programs as a percentage of the total graduates for all "under-represented" programs
